Comprehensive technology...reliable solutions

CARETECH

A division of Coastal Management

Your Comprehensive Technology Solutions

Simplify your IT environment...

With the rapid changes in marketplace technology, identifying technical resources that can enhance your company's productivity can be challenging.

In order to evolve with the changing environment, both small and large businesses require technology assistance that can not only implement changes, but anticipate them as well.

Coastal Management is proud to announce CareTech, your comprehensive technology solutions provider. CareTech has worked extensively with leading experts in the Information Technology field to identify the most pressing needs facing the marketplace today.

CareTech is committed to simplifying your IT environment with reliable solutions, while satisfying your business needs. We have assembled an outstanding staff certified in Microsoft server software and applications. Technical emergencies can happen anytime so we offer HelpDesk support, as well as technicians who are on call 24 hours a day.

In rare cases, if your technical needs exceed the scope of our services, we have built solid relationships with specialty vendors in our industry; this ensures we can address every issue your company faces.

We offer temporary technical aid, including both non-emergency and emergency assistance, at a competitive hourly rate.

Some of our services include:

- Email and Internet connection problems
- Virus detection and clean-up
- Microsoft application errors
- General software or hardware issues

Most organizations require regular system maintenance and network administration. Our certified Microsoft server and applications staff can be retained for long-term assistance.

Those services include:

- Hardware/software upgrades
- Back-up solutions
- Server and network maintenance
- Antivirus protection

We also offer consultation on a per-project basis. Some examples may include major purchases, disaster recovery, system or network installation.

In addition, we can assist you with the following services:

- Implementing internal e-mail
- Web design
- Disaster planning and prevention
- Update network infra-structure
- Installation of new network equipment or software.
